

I can't believe that you want to introduce Low Power FM (LPFM) into any area. It is so rare that you can find Christian music and family friendly broadcasting anywhere. KLOVE is one station that would be displaced by a LPFM broadcaster providing who knows what. It is in the interest of my family, the local community and in the public interest of all that radio station KLOVE (94.3 in Chicagoland) be able to continue broadcasting. Please reconsider!!
